

ABOUT MYSELF

I'm Md. Samiul Islam, a curious problem-solver and tech enthusiast with a background in Computer Science. I have a solid understanding of Python, Django, Next.js, Nuxt.js and Machine Learning. My passion lies in exploring web development, backend engineering and the potential of machine learning to solve real-world problems. For me, every project is an opportunity to learn, grow and create something meaningful.

EDUCATION

Degree	Institute	Board	CGPA	Year
B.Sc CSE	Green University of Bangladesh	Dhaka, Narayanganj	3.30	2020-2024

EXPERIENCE

- Astha Insight

Machine Learning Developer

– Worked with FastAPI, n8n, React, OpenAI API integration and Documentation writing

– in Implementing AI Agent

April 2025 - Present

Rajshahi (Remote)
- Coder Orbit

Junior Software Engineer

– Worked with VueJs, NuxtJS, NextJS, API test with PostMan, Documentation writing & Laravel

– in “Coder Orbit API Service”

July 2024 - March 2025

Kalshi, Mirpur 11
- Unicorn Software Solutions Ltd.

Front End Developer (Intern)

– Worked with VueJs, Primevue & Jira

– in “Unicorn Educational Institute Management System” Project

October 2023 - December 2023

Uttora, House Building

PROJECTS

- AI Assistant/Agent (OpenAI API + Google OAuth Authentication)

Progressive Web Application / AI Application

– AI assistant that integrates dynamic OpenAI model selection (Based on User Prompt) and Google Calendar event management through natural language prompts.

– LangChain to store chat memory

2025

Github Link
- RoBERTa-SAN For Text Classification (A Novel Transformer Hybrid Model Introduced By My Team)

Deep Learning

– Trained on Bangla Not Depressive, Depressive & Suicidal Classed Dataset (Collected Manually)

– Implemented in Kaggle Notebook

2024

Github Link
- Image Search by Text Prompt using CLIP

Python Application / AI Application

– Used CLIP to encode and compare text and image features.

– Display the top k most similar images based on cosine similarity between the prompt and image features.

2024

Github Link
- Sentiment Detector Using NLTK Library and Django

Machine Learning

– Simple Interface in Browser with Input Form Where User Will Insert Text

– NLTK Library Will Calculate Text’s Sentiment and Give a Score (Positive, Negative or Neutral)

2023

Github Link
- Simple Chat Room Web Application (Using HTML, CSS, Socket.IO & JavaScript)

Web Application

– Group Chat Interface

– Used the concept of Socket.IO

2022

Github Link

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript (ES6), Bash

Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Frameworks: Django, FastAPI, Streamlit, Laravel

Frontend Frameworks/Libraries: React/Next.js, Vue/Nuxt.js

AI & Data Science Tools: LangChain, Kaggle Notebooks, Google Colab

Developer Tools: VS Code, Github, n8n, Make.com, Figma

Operating Systems: MacOS, Linux, Windows

ACHIEVEMENTS

- **Dean's Award:**
 - Achieved the Dean's Award in Fall 2020 for securing a GPA of 3.80.
- **Research Paper:**
 - Published a paper on Bangla Sentiment Analysis (Natural Language Processing) in the *Journal of Business & IT*. ([Paper Link](#))

CERTIFICATIONS

- **AI For Everyone** Coursera
- **Business Implications of AI: A Nano-course** Coursera
- **Programming for Everybody (Getting Started with Python)** Coursera
- **Data Science Expert with Python Django** Simplilearn

LANGUAGE

- **English**
Full Professional Proficiency

FIELD OF INTERESTS

- Machine Learning & Deep Learning
- Natural Language Processing (NLP) Research
- AI Application Development & Workflows
- Generative AI (Stable Diffusion Models)
